

## SABZ PVC AU-67R

AU-67R is a medium molecular weight suspension resin. It has a narrow range of particle size distribution, high bulk density, and excellent dry-flow properties. This results into a high and uniform production rate in the extrusion process. This grade has been specially designed, and is recommended for, rigid PVC applications.

## TYPICAL PROPERTIES

Property	Value	Test Method*
K-Value	66 $\pm$ 1	DIN 53726
Appearance	White	-----
Bulk Density g/cc	0.54 - 0.58	JIS K6721
Volatile Matter	Max. 0.4%	JIS K6721
Particle Size		EAPCL Method
Passes 40 mesh	100%	
Passes 270 mesh max.	3%	

\* DIN :German Standards

JIS: Japanese Industrial Standards

## APPLICATIONS

Rigid PVC pipes, conduits and ducting, PVC profiles such as doors, windows and other sections, PVC corrugated pipes, PVC shrinkable film and also twist wrap candy film, rigid PVC compounds for extrusion.
